

FOOD GRADE SILICONE HOSE

Flexfab's Food Grade Silicone Hose is made of food grade approved materials.

Silicone hose does not crack or become porous, it maintains a very long and useful life

- Can last up to 5 times longer than other materials
- Has a high tear strength – it is much stronger than plastic or ordinary rubber hose
- Is resistant to ultraviolet rays

Silicone is not affected by bacteria

- The smooth continuous bore allows no place for bacteria to grow
- If needed, silicone hose can be sterilized in boiling water

Silicone hose is efficient and easy to use

- The translucent hose allows you to see your product move through the hose
- Low compression set means no re-tightening of fittings or clamps
- Metal fittings can be easily pushed onto the hose
- Remains flexible to -55°C

Hose Specifications:

- **TEMPERATURE RANGE:** -80°F to +500°F
 - Up to 250°F when using in tomato processing
- **VACUUM RATING:**
 - 9/16" and 5/8" = 3.9 psi / 3/4" = 3.4 psi / 7/8" = 2.9 psi
- **BEND RADIUS:**
 - 9/16", 5/8" and 3/4" = 5" / 7/8" = 7"
