

Flexfab **Silicone Milk Hose**

Means More Profit For Dairy Farmers!

- **Efficient and easy to use:**
 - Remains flexible to -55°C –no more wrestling with stiff hose in winter
 - Translucent - you can see the milk flow
 - Low compression set - does not require re-tightening of clamps
 - Accepts metal fittings easily - fittings can be pushed on with ease
- **Silicone Rubber is pure**
 - Food grade approved materials
 - Tasteless, odorless, non-toxic and no corrosive elements
- **Long life**
 - Silicone Hose lasts - approximately 5 times longer than other materials
 - High tear strength – stronger than plastic or ordinary rubber
 - Resistant to ultra violet rays – no cracking and deterioration
- **Fights Bacteria Development**
 - Smooth continuous bore - no place for bacteria to grow
 - Does not erode, crack or become porous - years of useful life
 - Silicone is not affected by butterfat, bacteria or dairy cleaning agents
 - Can be sterilized in boiling water
- **Costs a little more - but savings go on and on!**
 - Lasts 5 times as long as ordinary milk hose
 - Longer life means less time lost replacing hose and fittings
 - Longer life means less total cost of milk hose
